

MOBILE HOSE WORKSHOP

QUALITY. VALUE. SOLUTIONS.

Hastings Deering

MAXIMUM UPTIME, MINIMAL FUSS.

When a hose failure occurs, you expect the quickest and most reliable repair to maximise machine uptime and have your machine back into production as soon as possible. Onsite mobile hose workshops are engineered to provide immediate response with minimal fuss to your business.

QUALITY. VALUE. SOLUTIONS.

WHY YOU SHOULD CONSIDER A MOBILE HOSE WORKSHOP FOR YOUR JOBSITE

CONVENIENCE

With a Hastings Deering Mobile Hose Assembly Workshop and managed inventory to match your entire fleet physically onsite, hose replacement time is drastically reduced when a hose failure occurs. This minimizes your downtime and ensures your machine is in operation rather than sitting idle.

UNMATCHED INDUSTRY-LEADING TECHNOLOGY

Hastings Deering Hose Assembly Mobile Workshops feature specialized Cat tooling and associated software that have been designed to work as a system to ensure generation of safe and reliable replacement hose assemblies when an emergency occurs. This technology is unique to the industry and ensures that your replacement hose assemblies are built to OEM specs.

CONTAMINATION CONTROL

75-85 percent of hydraulic system failures can be traced to contamination. The Hastings Deering Hose Assembly Mobile Workshop is sealed from outdoor contaminants and features durable, high density cabinets and other storage solutions designed for clean, efficient storage of parts and tooling.

FREQUENTLY ASKED QUESTIONS

WHAT TYPE OF CUSTOMER IS IDEAL FOR AN ONSITE HOSE ASSEMBLY WORKSHOP?

Typically, customers with frequent hydraulic hose replacement needs where speed of getting their machine back in operation is critical such as those with mine sites and larger construction sites.

CAN A WORKSHOP BE CUSTOMIZED TO MATCH MY NEEDS?

Yes. There are three available sizes in 6 different configurations designed to meet various job site needs. Additional designs are also available dependent on your specific requirements. In addition to the ability to build replacement hose assemblies for Cat machines, various other OEM equipment can be served as well.

HOW SOON CAN I GET A WORKSHOP?

The order to delivery time for a complete Hastings Deering Hose Assembly Mobile Workshop is approximately 12-14 weeks.

WHO SUPPLIES THE TECHNICIANS FOR THE WORKSHOP?

Hastings Deering can provide a tailored staff solution to ensure you have hose support seven days a week. If required, a range of field service vehicles can be made available for full site coverage. We can also offer training packages to upskill your own staff to manufacture hydraulic hoses on site.
